

At Q-BOSS, our commitment to our clients goes well beyond equipment delivery. Our dedicated Service & After-Sales Division is locally present to provide continuous support, ensuring your equipment performs reliably throughout its entire lifecycle. From commissioning to maintenance, optimization, and long-term service, our experienced team is close at hand to safeguard your investment and support your operations, every step of the way.

## Your Long-Term Partner in Performance

**We can  
offer you:**

- Support from the very earliest concept design phase of a project with budget technical and commercial offers;
- Support during the bidding phase with firm and more detailed offers and design;
- Original spare parts specific for our equipment;
- Onsite and remote services (commissioning and start-up, maintenance and supervision, extraordinary repairs, remote monitoring assistance);
- Customised training courses at site, remotely or at our training centre facilities;
- Local certified service technician for commissioning, start-up, and maintenance;
- Compressor revamping and refurbishment activities; and
- Valve refurbishment.

To accommodate our growing operation you will find us at our updated premises:

**Unit 22, 5 Hines Road O'Connor WA 6163**
